The Industry
Fair Wear & Tear
Standard
for drivers of leased and financed cars
The aim of this guide

This fair wear and tear guide for the vehicle leasing industry is produced by the British Vehicle Rental and Leasing Association with the assistance of a specialist working group drawn from BVRLA members and independent market experts.

The aim of the BVRLA Fair Wear and Tear Guide is to provide an industry-wide, accepted standard that defines fair wear and tear on passenger cars when they are returned to a BVRLA member at the end of a lease or finance agreement. This guide covers passenger vehicles with up to eight seats.

Fair wear and tear occurs when normal usage causes acceptable deterioration to a vehicle. When BVRLA members review deterioration to the vehicle’s condition at the end of a contract or finance agreement, the age, mileage and use of the vehicle are taken into account.

Fair wear and tear is not to be confused with damage, which occurs as a result of a specific event or series of events such as impact, inappropriate stowing of items, harsh treatment, negligent acts or omissions.

The Fair Wear & Tear Standard

This guide defines the industry standard at return for every aspect of the vehicle’s condition. For ease of reference, the condition of the vehicle is considered under the following headings:

- General appearance, road safety, documentation, keys
- Paintwork, vehicle body, bumpers and trim
- Windows, glass, door mirrors and lamps
- Tyres and wheels
- Mechanical condition
- Vehicle interior
- Equipment and controls
Customers: advice and information

The vehicle must be used, maintained and looked after according to the vehicle manufacturer’s guidelines.

If a company car, your employer may outline preventative vehicle maintenance and road safety measures that you need to undertake on a daily or weekly basis. If you are personally leasing the vehicle, you should consult the leasing company or your service provider.

You will be given information at the start of the contract to help you satisfy the return standard required by the leasing company.

Following the advice provided will keep the vehicle in good condition and minimise any de-hire charges at end of lease.

Drivers should always follow the manufacturer’s recommendations regarding fuel and fuel blends, additives such as Adblue, lubricants and battery re-charging (if an electric or hybrid vehicle) because the vehicle’s warranty may be invalidated and long-term damage caused through inappropriate use of fuels, additives, lubricants and battery usage.

If you discover what you believe to be a manufacturer’s fault on the vehicle, you should alert the leasing company/service provider/dealership as soon as possible to get the issue resolved.

Personal numberplates

You should liaise with your leasing company/service provider/dealership 10 to 12 weeks before the end of lease to ensure your personal numberplate is transferred from your current vehicle to your new one.
End-of-lease charges

Why do we have end-of-lease charges?

End-of-lease charges occur when the vehicle, its equipment or accessories are not used, maintained or looked after as originally agreed at the start of the lease. The charges compensate the leasing company for the cost of rectifying damage or missing items such as keys or service history.

They can still be applied at end of lease in cases where the leasing company decides for commercial reasons not to repair damage, replace missing equipment, etc, before the vehicle is sold.

What customers should expect at vehicle return

You must be advised what to expect when the vehicle is collected. Some leasing companies may arrange a full vehicle inspection and condition report when the vehicle is collected. Other leasing companies will collect the vehicle and complete the full inspection later at the leasing company’s nominated site.

It is recommended that you are present when the vehicle is collected.

At collection, you and the representative from the leasing company must check and agree on the vehicle’s condition. All readily apparent damage to the vehicle will be noted on the vehicle collection sheet and both parties should sign the documentation or hand-held device.

What BVRLA members must do

On entering the lease agreement with you, BVRLA members must explain clearly to you their end-of-lease vehicle return standard, the condition of the vehicle (it must be roadworthy), the presence and condition of any vehicle keys and accessories and how they require you to look after the vehicle (eg servicing and maintenance) during the lease.

CONTINUED ON PAGE 6
End-of-lease charges (CONTINUED)

What customers should expect at vehicle return (CONTINUED)

If the vehicle cannot be inspected for any reason, due to poor weather or poor light, for example, you will be asked to agree to abandon the inspection and sign the condition report to that effect.

If the vehicle is not sufficiently clean to allow a detailed inspection, the collection process may need to be abandoned and a charge may be applied. You will be asked to agree to abandon the inspection and sign the condition report to that effect.

In case of a dispute

If the BVRLA member intends to charge you for damage or missing equipment when the vehicle has been inspected, you must be advised of those charges no later than four weeks after the vehicle was returned. The BVRLA member must provide you with a summary breakdown of the charges, an explanation of how the charges have been calculated and photographic/video or other documentary evidence supporting why the charges have been made.

You will also be advised how you can query the damage charges made.

In the event of a dispute about the condition or damage to the vehicle, customers have the right to pay for an examination of the evidence by an independent qualified engineer, eg an engineer who is unrelated to the original inspection and agreed by both parties. The engineer’s decision will be binding on both the customer and the BVRLA member. If the engineer finds in the customer’s favour, the BVRLA member will refund the reasonable cost of the examination to the customer.
General appearance, road safety, documentation, keys

All electronic safety features and devices to help the driver, eg parking sensors, adaptive cruise controls, etc, must be in working order.

The vehicle must be roadworthy and no warning lights should be illuminated.

There should be sufficient fuel (or residual charge in the battery if an electric vehicle) to effect the vehicle collection.

There should be no rust or corrosion on any part of the bodywork or trim of the vehicle.

Maintenance, servicing and repairs

The vehicle must have been inspected and serviced according to the manufacturer’s servicing/maintenance schedule. The service book supplied with the vehicle must be present and date-stamped by the service agent/repairer approved by the leasing company as evidence that the service has taken place.

All necessary maintenance and repairs must be carried out by a service agent/repairer approved by the leasing company. If the leasing company is not responsible for service, maintenance and repairs, a proper record must be kept and be available for inspection on the vehicle’s return.

If the service record is kept electronically, drivers should ensure the service agent/repairer approved by the leasing company has re-set the service interval display in the vehicle’s on-board service history unit.

Any repairs made to the vehicle before its return must be to a professional standard by repairers who can provide full transferable warranty on their work.

Unauthorised odometer changes are not acceptable. Any odometer alterations must have been reported to, and approved by, the leasing company.

CONTINUED ON PAGE 8
General appearance etc (Continued)

Documentation
All vehicle documentation, including the V5C vehicle registration document (where appropriate), MOT receipt, operation manual, service book and any other documents relating to vehicle equipment, must be intact and available. All documents must be in the vehicle on its return – including details of all audio equipment security codes.

Appearance
The vehicle’s exterior should be sufficiently clean to allow a detailed inspection. The inside should have been valeted, cleared of rubbish and the ashtrays emptied.

Vehicle keys
A full set of keys, including the master key, spares and locking wheel-nut keys, should be returned if originally supplied. If a remote locking system is fitted, the appropriate remote controls should be available and functioning.
Paintwork, body, bumpers & trim

There should be no rust, corrosion or discolouration on any painted area, including painted bumpers, body moulding and mirrors.

Repaired chips, scratches and dents are acceptable provided the work is completed to a professional standard by repairers who can provide full warranty on their work.

Obvious evidence of poor repair, such as flaking paint, preparation marks, paint contamination, rippled finish and poorly matched paint, is not acceptable.

Chips
Small areas of chipping, including door edge chipping are acceptable. If the areas of chipping require the entire panel, bumper or trim to be repaired or repainted, the damage is not acceptable.

Dents
Dents (up to 10mm in diameter) are acceptable provided there are no more than two (2) per panel and the paint surface is not broken.

Dents on the roof or swage line on any panels are not acceptable.

Scratches
Scratches and abrasions up to 25mm are acceptable, relative to the vehicle’s age and mileage, and provided the primer or bare metal is not showing.

Moulding, wheel arch trims
Scruffs and scratches up to 25mm are acceptable provided the moulding or trim is not broken, cracked or deformed.

Badges and labels
Badges, emblems, labels, logos and advertising livery applied by the customer to the bodywork or glass of the vehicle should be removed before returning the vehicle. Removing badges, emblems, logos and livery must be done professionally and the vehicle returned to its original colour and condition unless otherwise agreed in writing by the customer with the vehicle leasing company.

Any damage caused by fitting or removing badges, emblems, labels, logos and advertising livery, including faded paintwork, is not acceptable.
Paintwork etc (continued)

Soft and hard top convertibles
Convertible roofs must be fully operative and free from damage, rips and tears.

The rear window must not be cracked or creased.

Accessories originally supplied, e.g., tonneau cover, must be present and in good condition.

Tow bars
Tow bars must only be fitted with approval from the leasing company. If fitted, a tow bar must be in good, rust-free condition, with electrical connections that work properly. A ball cover must be in place.

Windows, glass, door mirrors & lamps

Windows/windscreens
Light scratching is acceptable provided it does not interfere with the driver’s line of sight and any heating elements still work properly.

Chips, cracks or holes are not acceptable.

Repaird chips within the driver’s line of sight are not acceptable.

Repaird chips outside the driver’s line of sight are acceptable provided they are repaired to a professional standard and the work is warranted.

Door mirrors
Missing, cracked or damaged door mirrors are not acceptable.

If adjustable and/or heated door mirrors, they must work correctly.

Lamps & lenses
All lamps must work.

Minor scuff marks or scratches up to 25mm are acceptable.

Holes or cracks in the glass or plastic covers of lamp units are not acceptable.
Tyres & wheels

Tyre wear & damage
All tyres, including any spare, must meet minimum UK legal requirements and comply with the vehicle manufacturer’s recommendations of tyre type, class*, size and speed rating for the vehicle.

There must be no damage to sidewalls or tread.

Evidence of uneven wear due to under- or over-inflation is not acceptable.

Wheels & wheel trims
Dents and holes on wheel rims and wheel trims are not acceptable.

Scuffs totalling up to 50mm on the total circumference of the wheel trim and on alloy wheels are acceptable.

Any damage to the wheel spokes and the hub of the alloy wheel is not acceptable.

The spare wheel (including ‘spacesaver’), jack and other tools must be intact, stowed properly and in good working order.

The emergency tyre inflation kit, if supplied when new, should be in full working order, serviceable and ready for use.

EU Tyre Labelling
Regulations effective 1 November 2012 describe the performance of a vehicle’s tyres according to three factors:

- FUEL EFFICIENCY (the tyre’s rolling resistance),
- VEHICLE SAFETY (the tyre’s wet grip) and
- EXTERNAL ROLLING NOISE (expressed in decibels).

Replacement tyres should be in the same class as those which are sold on the new vehicle.
Mechanical condition

The vehicle should be returned in a safe, legal and reliable mechanical condition, capable of passing an MOT test.

The vehicle’s engine management system should not be displaying any warning light, eg diesel particulate filter (DPF), tyre pressure system (TPS), or oil pressure. If a warning light is illuminated, the vehicle may not be driveable and the collection process abandoned, in which case a fee may be charged. Advisory illuminated alerts are acceptable, eg countdowns to the vehicle’s next service.

Vehicle underside

The following items are not acceptable fair wear and tear, because the driver has neglected to service the vehicle and/or failed to action warning messages from the vehicle management system:

- **brakes**
  - eg grooved brake discs or drums caused by excessive wear or metal to metal contact from worn out disc pads.

- **engine**
  - eg seized or damaged due to running vehicle with insufficient coolant, oil or with broken internal components.

- **manual transmission**
  - eg clutch slipping, noisy clutch or gearbox, excessively worn or ineffective synchromesh.

- **automatic transmission**
  - eg noisy gearbox or torque converter, abrupt gear changes, loose gear linkage.

Any impact damage to the vehicle’s underside is not acceptable.

Catalytic converters not working because of obvious abuse or damage are not acceptable.
Vehicle interior

Passenger area, seats, headrests and trim

The interior upholstery and trim must be clean and odourless with no burns, scratches, tears, dents or staining.

Carpets should not have holes.

All seats originally supplied must be present.

Interior fittings such as seat belts, rear view mirrors, courtesy lights, sun visors, door bins, etc. must be present, intact and free of damage.

Door aperture, boot, boot liner and luggage area

Scratches on treads, sills and seals that reflect normal use are acceptable.

Torn or split floor coverings and damaged surrounding trim panels are not acceptable.

Accessories such as parcel shelves, load covers, restraining straps and nets must be returned with the vehicle.

Equipment & controls

In-car entertainment equipment, telephones and navigation systems

All original equipment, accessories and controls must be present and operate correctly (including satellite navigation discs, Secure Digital (SD) cards and remote units, headphones, electric vehicle charging leads, Bluetooth and other integrated systems).

If accessories such as car telephones and other non-standard equipment have been wired-in or mounted on the dashboard, any holes or other damage must be neatly repaired when they are removed.

Aerials must be left in place or the hole must be neatly repaired.
Customers: vehicle appraisal tips

Please use this summary to appraise your vehicle against the BVRLA fair wear and tear standard prior to its return to the leasing company/service provider/dealership.

To avoid end-of-lease charges, you should arrange to repair unacceptable areas of damage before the vehicle is returned. Ensure the work is carried out to a professional standard by a repairer who can provide a transferable warranty for the work.

Check the terms of your contract.

Always point out any unrepaired wear or damage when the vehicle is collected to avoid problems later.

› Carry out an appraisal of the vehicle 10 to 12 weeks before the vehicle is due for return. This will allow you to arrange to have any unacceptable wear and tear rectified.

› It is important to appraise the vehicle as honestly as you can. Be objective. Ask a friend or colleague to help you.

› Choose a time and place with good light. This is how the leasing company will examine your vehicle. Appraisals carried out in poor light invariably miss some faults.

› Before appraising the vehicle, make sure that it has been washed and is thoroughly clean but remember to allow time for it to dry. Water on the paintwork can mask faults.
Walk all the way around the vehicle and examine closely each panel, including the roof, bonnet, doors and body, for significant damage. Observe where the light is reflected differently from any dents and scratches.

Crouch or kneel down at the front and rear of the vehicle and look along the bodyline on each side. This will help you see scratches and dents that may otherwise be difficult to spot.

Inspect lamps, lenses, windows and mirrors for chips, cracks and holes.

Check the tyres (including spare) for damage. Check that the wear on the tread across each tyre is even. Inspect wheels, wheel trims and wheel spokes for scratches and deterioration.

Clean and valet the interior.

Check upholstered areas for odours, tears, burns, stains and wear.

Inspect all controls, including audio equipment and accessories – they should be present and fully functional.

Of course, you may decide you want to keep the vehicle because you know its history.

Contact your leasing company – it may offer this vehicle, or others like it, at a very attractive price.
Customers: remember

On collection, the vehicle must be in a safe and roadworthy condition with all appropriate keys, equipment, accessories and documentation available.

- Your leasing company/service provider will arrange collection of the vehicle at the end of your lease. All readily apparent damage and wear, irrespective of liability, will be documented when the vehicle is collected. You will be given the opportunity to agree with the condition of the vehicle at the point of collection. Your leasing company will then be able to carry out a full assessment of your vehicle to calculate what end-of-lease charges, if any, are payable.

- If you cannot be present during the collection of the vehicle, or if other conditions, eg poor weather, prevent the vehicle from being inspected, your leasing company will issue you with a written condition report of the vehicle and advise you of any charges that may subsequently become due, together with summary details of how any charges are calculated. They will do this within four weeks of the return date of the vehicle.

- Ensure all your personal belongings are removed from the vehicle, eg sunglasses, music CDs from the player/multi-stacker, etc. Don’t forget to remove any item, including paperwork and other correspondence, that could reveal personal data about you, your family or friends.

- Remove your house key from the vehicle fob. Delete any personal contact and address information from the vehicle’s on-board communication system.

- Discs and cards for satellite navigation systems should be left in the vehicle at return.

- The vehicle’s numberplate should be intact and the characters making up the registration mark must be of the specified size and font set out in Road Vehicles (Display of Registration Marks) Regulations 2001.

Download the BVRLA’s vehicle condition report to ensure you address all relevant issues.
Examples of acceptable wear on vehicles returned at end of lease

Paintwork, body, bumpers & trim

Bonnet chips
Bumper scratches
Bumper scuff
Small area of chipping
Dent on body
Scuff on surface not penetrating base material
Examples of acceptable wear (CONTINUED)

**Tyres & wheels**
- Wheel trim scuff

**Vehicle interior**
- Interior fittings such as door bins must be present, intact and free of damage
- Scratches that reflect normal use are acceptable

**Other items to note**
- Service book, when supplied, must be stamped as evidence of servicing having taken place
Glossary

**Abrasion**
Multiple surface scratches

**Chip**
Removal of the surface material (glass or paintwork) in a concise area

**Dent**
Deformation of the surface structure, usually caused by impact damage

**Light scratch**
A scratch with no raised edges

**Scratch**
A single line mark or score in the surface material

**Scuff**
Light scraping of top surface not penetrating base material

**Smart repair**
Small and medium area repair technique – a cost-effective way of repairing chips, dents and scratches

**Swage line**
Folded edge on a panel of the vehicle
Dispute handling & conciliation process

**BVRLA Code of Conduct**
All contract hire and leasing companies in membership are obliged under the BVRLA Code of Conduct to trade fairly and responsibly in all dealings with their customers.

*A copy can be downloaded from the BVRLA’s website: www.bvrla.co.uk*

**BVRLA conciliation process**
On occasion, disagreements will arise between customers and BVRLA members which cannot be settled directly. Unresolved disputes may be referred to the association by the customer and/or the member involved.

Details should be submitted in writing to:

**Chief Executive**
British Vehicle Rental & Leasing Association
River Lodge
Badminton Court
Amersham
HP7 0DD

Alternatively, a complaint form can be downloaded from the BVRLA’s website: www.bvrla.co.uk
